PROFESSIONAL SUMMARY

Experienced Software Engineer with over 5 years of expertise in JavaScript, React.js, Next.js, and React Native, specializing in building scalable, high-performance web applications. Proficient in modern UI frameworks and styling libraries, including Chakra UI, Tailwind CSS, and SCSS. Skilled in designing responsive, accessible, and maintainable user interfaces while optimizing performance. Strong collaboration skills with a track record of managing complete frontend development lifecycles, from design to deployment. Passionate about writing clean, efficient code and troubleshooting UI-related issues.

EXPERIENCE

Snr. Frontend Engineer

BitSynk (July 2025 - present)

- Led frontend development for a high-traffic marketplace platform, integrating advanced eBay API features for listing automation and order synchronization.
- Designed and implemented a scalable real-time chat system using WebSockets, Socket.io, and Zustand for state management, supporting thousands of concurrent users
- Improved application performance by 35% through code splitting, lazy loading, and advanced caching techniques in collaboration with backend engineers

Mid level - Frontend Developer

Speedycardlister (September 2024 - present | Contract)

- Developed efficient and well-documented React.js code, enhancing the marketplace UI with seamless eBay API integrations.
- Optimized frontend performance and ensured smooth deployments by collaborating with backend teams on API integrations and caching strategies.
- Built and styled a responsive, interactive card reader AI interface with real-time features using WebSockets and state management.

Frontend Developer

MindCareConnects(September 2024 - December 2024 | Contract)

- Created a menu management system with an integrated online payment gateway.
- Implemented features to enhance order processing efficiency and incorporated real-time notification functionality.
- Created a highly secure online payment system with real-time notification features to enhance restaurant operations.
- Implemented caching strategies and resolved server bottlenecks to optimize performance.
- Ensure data integrity and privacy, while integrating analytics tools for operational insights.

Frontend Mentor

Google Developers Student Club (April 2020 - December 2023 | Internship)

- Demonstrated effective leadership skills by co-leading the Google DSC chapter, taking charge of organizing and coordinating all club activities.
- Took an active role in providing mentorship and unwavering support to club members, facilitating their growth in tackling complex coding challenges, developing projects, and acquiring valuable skills
- Led skill-building sessions focused on enhancing technical expertise and improving frontend development best practices.

SKILLS

- **TECHNOLOGIES:** JavaScript, TypeScript, React.js, Next.js, React Native, Tailwind CSS, Chakra UI, SCSS, RESTful APIs, GraphQL, Git/GitHub, HTML, CSS, Redux, Zustand, Framer Motion.
- **TECHNICAL SKILLS:** Unit and automation testing, software architecture, scalable frontend development, test-driven development, frontend security, performance optimization, accessibility, component-driven development.
- **SOFT SKILLS:** Good interpersonal relation skill, Creative thinking, Strong problem-solving skills and the ability to diagnose and resolve complex technical issues.

EDUCATION | CERTIFICATION

- | | |
|---|------|
| • Frontend Professional Developer Certificate | 2025 |
| ALX Africa (Holberton School-powered program) | |
| • Bachelors of Engineering, Metallurgical Engineering | 2024 |
| Kwara State University | |
